

Plant Hire Specialists

Welcome to Scott's Hire

Scott's has been involved in major UK infrastructure projects for over 30 years.

Today, the business owns and operates a modern construction fleet of more than 2,000 items including excavators, dump trucks, telehandlers and rollers.

Scott's specialises in providing a fully serviced, maintained and managed fleet either on an operated or self-drive basis to some of the biggest projects and contractors in the UK.

We operate a policy of continual improvement to ensure all our equipment is of a young age which results in fewer breakdowns and less setbacks for our customers.

90% of our telehandlers are under two years old enabling us to provide Tier 4 engines.

80% of our excavators are under three years old which ensures our customers always get the benefits of the latest innovations and features as standard on our machines.

We deliver on quality by putting our focus firmly on our customers.

We invest the time and resources in getting to know our customers: their objectives, demands and challenges.

We then take this understanding and turn it into bespoke solutions tailored to each customers' unique requirements.

Our Core Values

- Innovations
- Sustainability
- Safety
- Quality
- Environment
- Training & Development
- Community Ethos

"HSS have a long standing contract with Scott's Hire. We have enjoyed an excellent relationship with them and they support HSS with a number of our key account contracts. They provide exceptional service and are always flexible to customers changing demands. They have a 'can do' attitude that runs through the business which means we have a dedicated and customer focused partner to work in partnership on some of the prestigious contracts in the equipment rental sector."

Jon Overman
Group Sales Director, HSS Hire

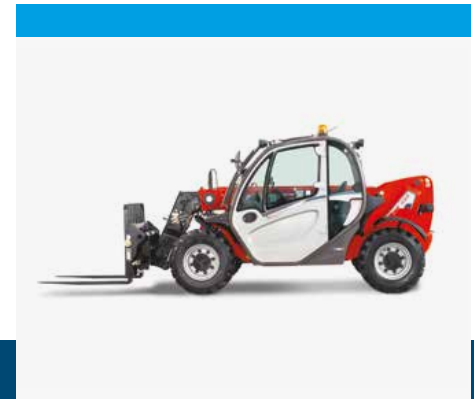

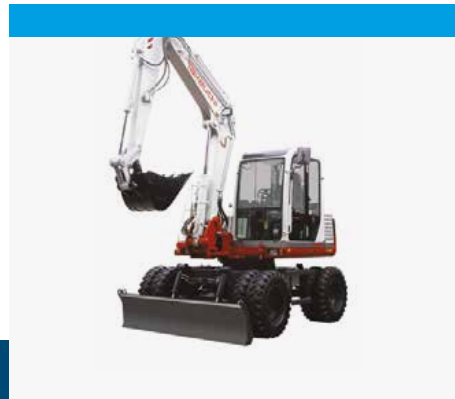

"I have been dealing with Scott's Hire for over ten years and found them to be very dependable and responsive to my organisation. In particular Scott's have the best equipment that is well maintained and are second to none in a crisis when you need assets/equipment at a very short notice or out of working hours. They can be summarised as a service providers that takes pride in delighting its customers."

Jon Butterworth MBE, MSc, FioD
Director, National Grid Plc

The business has invested heavily in machinery and equipment in recent years to support strong growth.

This has built us a reputation for operating a modern and well maintained fleet, as well as providing additional services such as bulk earthmoving, site remediation to the agricultural and construction markets. Whilst we have a comprehensive range of equipment for hire and sale, if you're unable to find a particular piece of equipment for a job, give us a call, if we haven't got it we will do our best to source it for you.

Rollers

- 80cm Rollers
- 100cm Rollers
- 120cm Rollers
- 130cm Rollers
- 135cm Rollers
- Pedestrian Rollers complete with trailers

Compressors

We supply trailer mounted air compressors which allow you to use compressed air and air powered tools, e.g. Breakers, on even the remotest sites. We can also supply a range of air powered tools to go with the compressor. We have two sizes dependent on the intensity of the job which is needed and stock both Ingersoll Rand and Atlas Copco manufactures.

- 80 – 104 CFM Compressor
- 105 – 160 CFM Compressor

Bowers

We have a range of 1000 & 2000 litre diesel and water bowzers, allowing the safe storage of surplus materials on site to increase productivity.

Our diesel bowzers are bunded and come with fuel pump attachments.

Small Tools

We have a large stock of small tools available mainly focusing around the needs of utility work however if you require something different we can easily arrange it for you. All tools can be hired on a short or long term basis

- 14" petrol floor saw
- 12" stihl saw
- 8, 9 & 12" wacker rammers
- 2" submersible pumps
- 2" petrol water pumps

Our 24 hour call out promise

- Ensure projects run smoothly
- Avoid costly delays
- Reduce knock on effects to planned work
- Carry on using equipment out of normal hours
- Theft recovery service
- Fully qualified LOLER engineers
- Telematics on equipment
- 24 hours technical support

Business Sector Experience

Civil Engineering

Each site may require a different set of equipment to the next. Our fleet portfolio is diversified enough to have a machine to suit any application. Accurate delivery times are essential in this line of work as delays can cause a knock on effect which slow projects down.

We offer a 24/7 emergency call out service 365 days a year.

This includes our full range of equipment on either a self-drive or operated basis.

The industry's we work with are always under pressure to perform day or night so being able to provide a service which is flexible and reactive is a crucial part of our business.

This is a service we offer to all our customers no matter what size the account is.

Utilities

Having designed the award winning DigaDoc safety trailer in house we understand the needs of the utility industry second to none, whether it be offering a first class service or coming up with innovative solutions faced by our customers we always deliver.

Construction

Working in a highly competitive industry we understand that strong inter-company relationships enhance the service we are able to offer. Being flexible to work with our customers is what separates us from our competitors and ensures repeat business.

Long Term Contract Hire

We understand customers might have exacting specifications they need from their machines whether it be loading shovels or waste and recycling excavators. We provide, maintain & service the perfect machine for the job based on a long term hire allowing us to offer the most competitive price.

We have found that working with large accounts which are managed by multiple personnel at the customer end makes it harder for us to anticipate our customers' needs and provide the service we strive for.

The importance of an Implant

To combat this we offer the service of a Scott's personnel implant based in our customers offices. We always ensure the specialist is knowledgeable within all the relevant sectors enabling them to respond to queries, questions and requests quickly and efficiently.

We have found this highly beneficial as it enables us to build strong relationships with the relevant departments, creates efficiencies by reducing administration, downtime and even by interfacing directly into both companies' systems.

- Time saving
- Cost reduction
- Peace of mind
- Local knowledge
- Nationwide support
- Industry trained
- Reduced administration
- KPI reporting
- Query resolution

Safety

- Training and education of our employees to ensure they have the skills, knowledge and qualifications to adhere to the safest working practices.
- Equipment fitted and maintained to the highest standards of health and safety.
- Actively encourage our business partners to promote good health and safety practices as part of supplier approval and monitoring procedures.
- These initiatives and many more are reinforced by our comprehensive health and safety policy in order to provide and maintain a safe and healthy working environment for all employees, visitors and customers.

The background features a large, light blue sun in the center, with silhouettes of construction equipment and workers. On the left, there is a silhouette of an excavator. In the center, a large silhouette of a tracked vehicle, possibly a bulldozer or crawler loader, is shown. To the right, two silhouettes of workers wearing hard hats are standing and talking. The background also includes silhouettes of trees and a landscape. The overall color scheme is various shades of blue.
